Tally.ERP 9 fully enables the users to be on the top of the situation.
14	General	Support Centre	Tally.ERP 9 brings a unique experience to the customers in terms of managing their support requirements. Every user can write to our support desk directly from Tally.ERP 9 software regarding any help/assistance/clarification he/she needs in understanding or using Tally.ERP 9. For this we have provided a feature called Support Centre, which helps the user to directly get in touch with the support desk. The customer is also given the liberty of closing the support issue that he has created. This facility also helps the organization to understand the type support issues that are getting created from his organization so that steps could be taken to educate\ train the issue to solve the repeated issues on a particular topic. For example the MD of a company gets to know that out of 10 support issues, 8 are relating to TDS clarification, he could decide to get his staff trained on TDS feature. This helps the organization to enhance their product knowledge and use their time more effectively.
